WHAT
WE DO

**CUSTOM
Machining**

We Like To Make Things Up

We Like To Make Things Up.

When it comes to machining, we'll make up just about anything. From high-production CNC to simple parts to precision-turned components to replacement parts for obsolete machinery. Whether custom or contract. Whether one-offs (single units) or thousands at a time. You name it, we'll make it up.

Creative Solutions for your Unique Needs

Our Capabilities

Following are just *some* of the products, services, and benefits we can provide you.

- Expert machining and grinding of all machinable materials including all steels, plastics, composites
- Custom CNC machining, approved as Tier One supplier to various OEMs throughout the country
- Contract CNC production machining/manufacturing
- Speedy delivery
- Competitive pricing – lean manufacturing techniques provide you substantial cost savings
- Solid reputation as the premiere repair shop in the region
- Well-equipped shop for servicing large work
 - 43,000 sq. ft. facility
 - Large equipment for machining large pieces (turning up to 104" diameter and lengths up to 240")
 - Overhead cranes servicing 95% of shop space and lifting up to 20 tons
- Short- & medium-run specialists, from one-offs (one piece) to a thousand units or more
- Prototype creation
- Tooling/fixturing
- Overflow production machining
- Competitive shipping costs
- 24/7 TurboServ™ Emergency Machining and Repair Services for production lines
- Machinery troubleshooting/diagnostics/repair/rebuild/modification services
- Custom machinery building
- Service since 1956

Engineering Services

- Custom concepting/design/engineering/Finite Element Analysis (FEA)/fabrication – complete engineering & design department with 3D Modeling & CAM capabilities and P.E. staff at your disposal

Expert Craftsmen offering the following:

Precision Outlet Valve Pad

- PED/CE certification
- ASME Section VIII, Div. 1 "U" certification
- National Board "R" repair stamp certification
- API-620 and API-650 certification
- ASME B31.3 process piping certification
- OSHA training and certification
- CSE (Confined Space Entry) certification
- USDA and FDA certification
- Impeccable quality -- experienced Journeyman Machinists, each with over 20 years of experience (no trainees here)

JUST HOW FAST IS FAST?

Well, just how fast do you *need* it? With multiple production shifts, HOLLOWAY America is uniquely positioned to be on your job *now* to get it back to you quickly.

Materials of Construction

- Expert machining and grinding of all machinable materials including all steels, plastics, composites

Industries served

- Machining applications for every industry including:
- Energy (oil, gas, natural gas, LP, electricity, solar, wind)
 - Railroad
 - Aviation & Aeronautics
 - Chemical
 - Food & Beverage
 - Pharmaceutical & Biotech
 - And so many more

The result? The piece you need, better than you could have imagined. Because it's all about you. Your product. *Your way.* The HOLLOWAY America way.
